New Delhi

Summary

Computer Science graduate aspiring to build user-focused, AI-powered products. Experienced in product case studies, requirements documentation, semantic search development and software testing. Skilled in breaking down user problems, designing practical solutions, defining success metrics and using technical knowledge to support product decisions..

Experience

Summer Intern – Software Development Training Jun 2025 – Jul 2025
RMML, Indian Institute of Technology (IIT), Ropar, Punjab

- Owned an Interactive Android Platform for Real-Time Data Monitoring end-to-end, from requirements to a working, tested release, using AI-assisted development.
- Gathered requirements and authored the PRD, turning open-ended needs into clear feature specs.
- Ran QA testing and root-cause analysis on 5+ critical bugs, cutting the crash rate by 30% before release.

Projects

24-Hour Refund Window – E-commerce Return Policy | *Product Case Study* 2026 – Case-Study

- Proposed a policy to curb use-and-return abuse: refund or exchange within 24 hours of delivery, exchange only after, with an exception for verified defects or wrong items.
- Mocked up the key screens (post-delivery timer, return item button, return reasons) as an app prototype, framed for Amazon, Flipkart, and Myntra.

EchoShield – AI Voice Deepfake Detection | *Team Lead* 2026 – echoshield.in

- AI tool that detects voice cloning and deepfake audio using a BiLSTM neural network, reaching 93.8% accuracy.
- Led a 4-member team over 3–4 months, owning research, timelines, and delivery; presented to faculty and an external examiner.

AI GitHub Search – Product Case Study | *In Progress* 2026 – GitHub

- Defined why AI-powered GitHub search surfaces relevant but outdated repositories; wrote a full PRD with personas, user stories, ranking logic, MVP scope, and success metrics.
- Building the data pipeline that combines semantic relevance with freshness signals for ranking.

Skills

Product Management: PRD Writing, User Research, User Stories, Competitive Analysis, Prioritization, Prototyping & Mockups
AI & Automation: Generative AI Tools (Claude, ChatGPT), Prompt Engineering, AI-Assisted Development
Technical Foundations: Python, SQL, Agile Fundamentals

Education

IMS Engineering College, Ghaziabad (AKTU Lucknow) 2022 – 2026
B.Tech — Computer Science & Engineering *76%*

Morning Star Children's Academy, Orai 2021 – 2022
Class 12th, CBSE *67%*

Morning Star Children's Academy, Orai 2019 – 2020
Class 10th, CBSE *79%*

Achievements & Leadership

Event Management Head – Elite E-Gaming

- Managed 20+ students and led the highest-participation event of the college tech fest, under faculty guidelines.
- Coordinated logistics, timelines, and stakeholder communication for 3+ events with 100+ participants.

College Ambassador – SKOAR! College Cup: Delhi Edition

- Drove participation and represented the gaming community at college for a national-level tournament.
